

RECARO

YOUNG LINE

CHILD RESTRAINT SYSTEMS

BECAUSE YOUR
CHILD IS WORTH IT.

Safety, ergonomics and comfort - right from the start

BECAUSE YOUR CHILD IS WORTH IT.

RECARO With over one hundred years of company history and long-standing expertise in the construction of high-quality car seats – from professional racing shells to the production of standard seats for renowned vehicle manufacturers – we know how to make sitting a pleasure – even for our smallest customers.

Safety, ergonomics, design, comfort and quality – these were the keywords we used in the performance specification for our developers, designers and engineers.

The result was an unrivalled child seat range. Like their big brother the car seat, all products in the RECARO Young Line are distinguished by their excellent features.

Only at RECARO are all child seats treated like adult car seats and tested in accordance with the stringent requirements of the automotive industry.

What's more, your little ones will sit in "a real RECARO" – a very special feeling.

There are significant differences in terms of safety and comfort among the numerous child seat systems currently available on the market. Not all child seats are equally effective in every vehicle, you must therefore ask yourself the question. "Which seat is the right one for our child?" The answer has to be: a RECARO – without a doubt the best decision.

FEEL THE DIFFERENCE.

The "right" child seat is distinguished by several important factors. As age is regarded as a guide only, the seat must be perfectly matched to the weight of the child. The child seat and vehicle must be perfectly coordinated as only then is optimal safety guaranteed. We always recommend that you take your child for a sitting and fitting session at your dealer. Then you will quickly see whether the seat fits the vehicle and whether or not your child likes it.

The RECARO ISOFIX system is an extremely safe and convenient alternative to securing the child seat with the vehicle's seatbelt. This enables the two seats RECARO Young Profi plus (ECE Group 0+) – which ADAC confirmed in 2007 as providing the greatest safety in an accident (1.3) – and the RECARO Young Expert plus (ECE Group I) to be quickly and easily fixed in the car. The standardised mounting points in the vehicle easily anchor the platform onto the locations provided (vehicle must be factory-fitted with ISOFIX). The seats are then firmly connected to the ISOFIX platform with our own developed mechanism. It is then no longer necessary to fasten the seat using the 3-point standard seat belt but this can be used as an alternative.

Regardless of which RECARO Young Seat you choose, you can be sure that nothing is closer to our hearts than safe driving pleasure for you and your family.

ALWAYS THE RIGHT CHOICE.

By law, restraint systems must be used for securing children into a vehicle. Child safety seats must be constructed, tested and approved. All New Zealand RECARO seats are tested in accordance with ECE Regulation 44/03 or 44/04 and bear the ECE test mark.

The European categories for child safety seats let you quickly and easily choose the appropriate seat for your child.

The right seat not only has to fit but also has to please the little ones.

The ECE standard differentiates between four different weight groups, which can be seen in the following table.

RECARO YOUNG LINE OVERVIEW			
ECE GROUP 0/0+	ECE GROUP I	ECE GROUP II	ECE GROUP III

ISOFIX BASE

for Young Profi Plus and Young Expert Plus

Play it safe – RECARO ISOFIX Base

ISOFIX is an international, standardised mounting system for groups 0+ and I child seats that have their own harness system. In the vehicle, appropriate ISOFIX anchors are permanently mounted to the body-shell. These standardised mountings enable the RECARO ISOFIX Base to be anchored simply and quickly. Its adjustable supports make it a safe and stable basis for the RECARO Young Profi plus (up to approx. 15 months) and the RECARO Young Expert plus (up to approx. 4.5 years).

RECARO ISOFIX BASE

The benefits of the RECARO ISOFIX system:

- Simpler handling for installing the seat in the vehicle, the chances of misfitting being greatly reduced.
- Optimal protection is provided by the direct link between system and vehicle bodyshell, irrespective of the position of the anchor points on the adult harnesses.
- The RECARO ISOFIX Base is also suitable for ECE Groups 0+ and I and therefore needs to be purchased only once.
- Seats can also be used in vehicles without ISOFIX anchors (attachment with vehicle's 3-point seat belt).

Equipment:

System: mounting point for RECARO Young Profi plus and RECARO Young Expert plus; **foldable base:** simple to handle and easy to transport between vehicles; **standardised:** light and quick installation in almost all vehicles equipped with ISOFIX, simple instructions for easy assembly in the car, visual display for whether the system is correctly installed; **safety:** absolutely safe anchoring to the ISOFIX points of the vehicle.

ISOFIX Base

ISOFIX fitted

YOUNG PROFI PLUS

the infant carrier for maximum safety

Top Features:

- **Infant carrier that grows with the child:** back rest can be adjusted 5 times, to suit the size of your child.
- **Impact safety:** double sided impact protection and additional seat reducer firmly attached to the shell for maximum protection of the head in a side impact.
- **Safety plus:** the adjustable back enables the harness system to grow with the child.
- **Test winner 2007:** in the area of accident safety.
- **Comfort and safety:** lightweight, highly stable shell.

High-quality coverings: all covers are removable and suitable for machine wash at 30°C

POLARIC

maximum 'safety'

Top Features:

- **Unrivaled:** unique fixing system enables firm and safe installation rearward facing on the back seat of the vehicle.
- **Comfort and safety:** belts for fixing the RECARO Polaric to the front seat prevent the seat from rising in case of a rear end collision.
- **Comfort:** fold-away floor support made of stable metal, length can be adjusted and made to fit in many vehicles.
- **Safety:** attachment of the seat rearward facing, absolutely safe anchoring to the ISOFIX points of the vehicle, large side protection shell for safety in a side collision and lateral support when cornering.
- **Travel comfort:** easy and quick installation in almost all vehicles equipped with ISOFIX.

MONZA

the perfect combination of comfort and design

Top Features:

- **Comfort:** unique passive **RECARO Air Circulation System ACS** for air circulation.
- **Safety plus:** the headrest that can be continuously adjusted in depth ensures a safe sleeping position for the child (see ill. 1 – 3) as the head of the sleeping child does not fall forward and does not leave the protective headrest area.
- **RECARO Sound System:** integrated speakers in the headrest for individual audio programme, practical MP3 player pouch on the seat.
- **Ergonomics:** best seat comfort thanks to ventilated foam that is used in the automotive industry.
